Newport System Component Parts

Typical Wall Mount Installation With Double Sliding Doors

Typical Glass Mount Installation With Single Sliding Door

The Newport Series Sliding Glass Door System brings a contemporary new look to the home or the office. It can be installed on glass partitions or directly to the side of a sufficiently reinforced wall. The adjustable Top Rollers make final adjustments quick and easy, without the need to remove the door. Their smooth operation and solid stainless steel construction minimizes maintenance issues.

USH provides you with all the glass attachment fasteners for either flush mounting, which needs a countersunk hole, or surface mounting, where a straight hole is needed. The glass attachment fasteners accommodate either 3/8" or 1/2" (10 or 12 mm) tempered glass.

NOTE: Laminated glass cannot be used in these systems.

Standardized sets allow you to make planning and purchasing quick and easy for basic installations. We offer four different complete installation assemblies; two for wall mounting, and two more for glass mounting. Available accessories give you the opportunity to customize the standard sets to accommodate the most imaginative designers. All components are sized to easily ship via UPS, which helps to keep your job costs and lead times down.
